

TEWFIQ FERAHI

Lead Product Designer

Documentation • Knowledge Systems • AI Product Design

Paris, France

+33 7 88 10 42 46

tewfiqonline@gmail.com

PROFILE

Lead Product Designer with 10+ years of experience designing digital products, design systems and AI-powered experiences across public services, enterprise organizations and higher education.

I specialize in transforming complex systems into products people can understand, adopt and use.

My work combines Product Design, Documentation Design, Information Architecture, Knowledge Systems and AI Product Design. I build documentation as a product: searchable, visual, reusable and continuously improved through real usage.

I collaborate closely with Product Managers, Engineers, Designers and Business stakeholders to simplify complexity, accelerate product adoption and improve learning experiences.

CORE SKILLS

Product Design	Product Discovery, Product Strategy, UX/UI Design, Interaction Design, Service Design, Information Architecture, User Flows, Wireframing, Interactive Prototyping, Design Systems, Accessibility (RGAA / DSFR)
Documentation & Knowledge Systems	Documentation Design, Technical Documentation, Content Design, Information Architecture, Knowledge Base Design, Knowledge Management, Documentation Workflows, Search Experience, Developer Experience (DX), Documentation Systems
AI Product Design	Generative AI, AI Product Design, Prompt Engineering, Context Engineering, AI Workflows, AI Prototyping, LLM Evaluation, AI Adoption, AI-assisted Design
Collaboration	Design Sprint, Design Thinking, Facilitation, Workshop Animation, Stakeholder Management, Product Leadership, DesignOps, Cross-functional Collaboration
Tools	Figma, FigJam, Notion, GitHub, Markdown, Cursor, Claude, Mistral, ChatGPT, v0, Next.js, Tailwind CSS, Vercel, Framer, Webflow

PROFESSIONAL EXPERIENCE

Senior Product Designer & AI Product Consultant

Freelance • Paris
2013 – Present

Supporting public institutions, enterprise organizations and startups in designing digital products, AI workflows and knowledge systems.

Key responsibilities

- Product Discovery and UX Strategy
- Documentation Design and Information Architecture
- Design Systems and DesignOps
- AI Product Prototyping
- UX Research and Product Validation
- Product Documentation
- Knowledge System Design
- Cross-functional Facilitation

Selected achievements

- Designed digital products for 30+ organizations
- Structured documentation and design decisions across multidisciplinary teams
- Built reusable Design Systems and documentation patterns
- Facilitated Design Sprints and Product Discovery workshops
- Designed AI-powered workflows and product experiences
- Led workshops with Product, Engineering and Business teams

Selected clients

DINUM • BNP Paribas • EDF • Enedis • Orange • Renault • Prisma Media • Club Med • La Banque Postale • Publicis Sapient • ORANO • TotalEnergies

Lead UX Designer – Design Systems & Documentation

DINUM – French Government
2022 – Present

Lead UX governance for "La Suite Numérique", a large-scale collaborative platform for French public services.

Responsibilities

- UX Governance
- Information Architecture
- Documentation Design
- Design System (DSFR)
- Accessibility (RGAA)
- DesignOps
- AI Integration

Achievements

- Improved consistency across complex public digital services
 - Structured documentation for product and design decisions
 - Harmonized UX practices across multiple teams and providers
 - Contributed to accessible and reusable design standards
-

UX Principal

EDF / Enedis
2023

Led UX initiatives supporting digital transformation programs.

Responsibilities

- Product Discovery
- Complex User Journeys
- UX Strategy
- Workshops
- Product Prototyping
- Design Recommendations

Lead UX Designer – UX Center

BNP Paribas
2017 – 2019

Co-led the UX Center supporting enterprise innovation and product strategy.

Achievements

- Facilitated Design Sprints
 - Structured product decision-making
 - Documented UX practices
 - Trained more than 100 executives in Product Design and Design Thinking
 - Supported cross-functional product teams
-

KNOWLEDGE ENGINEERING

2023 – Present

Designed and maintain a living knowledge system dedicated to AI products, documentation and product design.

Track Record

- 1,128 documented AI solutions
- 39,000+ Claude conversations
- 3.5M+ Claude tokens processed
- 1,430+ ChatGPT active days
- 4,655+ GitHub contributions
- 279 deployed projects

Daily used for:

- Product Design
- Documentation

- Consulting
 - AI Product Building
 - Teaching
 - Continuous Technology Watch
-

TEACHING & KNOWLEDGE TRANSFER

AI Product Building Instructor
Since 2023

Teaching Product Design and AI Product Building for Bachelor, Master and MBA students.

Institutions

ECV Paris

Digital College

EDC Paris Business School

Ascencia

École Conte

Strasbourg Digital School

Topics

AI Product Design

Documentation Design

Knowledge Systems

UX Design

Design Systems

Prompt Engineering

Product Discovery

Generative AI

More than **1,500 students** trained.

SELECTED PROJECTS

Knowledge Studio

Designed a documentation-first product demonstrating documentation as a product experience through information architecture, reusable patterns and interactive knowledge systems.

AI Product Building

Designed workshops, documentation and educational experiences helping organizations adopt AI through practical product development.

Documentation Design System

Created reusable documentation components and knowledge patterns supporting consulting, teaching and AI product design.

EDUCATION

DEA – E-Management & Information Technologies

Université Paris Dauphine

Master's Degree – International Economics

Université Paris 1 Panthéon-Sorbonne

Bachelor's Degree – Econometrics

Université Paris 1 Panthéon-Sorbonne

PROFESSIONAL TRAINING

Design Sprint 2.0 — Le Laptop

Design Thinking — Thiga

LANGUAGES

French — Native

English — Professional

Arabic — Conversational

INTERESTS

Knowledge Systems
